INVITATION FOR BID: GSA-021-18
PRISONER TRANSPORT VAN

Question submitted by Triple J. Enterprise 7/23/18
Clarification due to "Photos" received on 7/23/18

Question 1:

The photo seems to show a tall van. Since there are no height requirements listed in the bid specifications we need clarification. Does the van need to have a minimum interior prisoner compartment height of about 4' ft or a minimum interior height of 5' ft or something different?

Response: See attached "Amendment 4"

Question2: (3 parts)

1. Is this side door exit step referring to the driver's door or the prisoner compart? If it's referring to the prisoner compartment it would mean there should be another prisoner seat at the side when you open the side door.

Response: Exit step referring to prisoner compartment door. Yes
The photos provided do not show a side view of the van. The bid specifications state on page 30 of 32 a "side entrance/exit opens out with step assist.

2. Is there a requirement for a prisoner seat at the side or only in the rear?

Response: Yes, there should be prisoner seat when opening side door maximizing on seating arrangement spaces for transport.

3. Is a sliding side door acceptable regardless?

Response: Individual prisoner rear or side loading acceptable or both

Note: A side door will not be used for passengers unless there's a side prisoner seat required because it will open up to the rear prisoner compartment wall which will fill the entire cargo compartment.

Question 3:

What is the minimum amount of rear prisoner seats required for each side?

Response: Dependent if rear loading estimated minimum of 6 prisoners, if side loading estimated 4 prisoners minimum.
